DETAILED ACTION

Claims 24, 25, 27-30, 33 and 34 are pending and rejected.

No claim is allowed.

Response and amendments filed in paper no. 23 are entered. Declaration and request for reconsideration was further considered in view of the interview on 6/25/02. with J. Paris, Charles Muserlian, Jose Dees, Jean Francois Burlin and Sylvia Delpy. Examiner is thankful for the personal interviews and discussions on art rejections and Declaration which were very helpful.

All the issues were carefully re-considered by the Examiner. No new art rejection is made at this time till a reply being received for this action. All the rejections are maintained for the same reasons as set forth in our previous office actions.

Since the whole argument in the declaration and interview was based on the continuous administration of estradiol and nomegestrol, which does not find support by the Applicant's disclosure.

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Priority

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification; for example, this application is a 371 of -----.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 24, 25, 27-30, 33 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

What is intended by “continuously without interruption” in lines 5 and 6 of claim 34? How long will be continuous?

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24, 25, 27-30, 33 and 34 rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for administering the combination of norgestrel and estradiol in a continuous or intermittent fashion, from 21-25 days per month” (see lines 4-6, on page 4 of the specification), does not reasonably provide enablement for “continuously without interruption” and not limiting “how long” will be “continuous”. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims. Since all the showing and discussions were

Art Unit: 1616

based on continuous administration without bleeding, the invention as claimed does not find support by the disclosure of the invention.
